

Meredith Corporation's Money.com Reveals The 2019-2020 Best Colleges For Your Money

University of California-Irvine Ranked No. 1 Best College for the First Time

List Ranks More Than 700 Colleges in America

DES MOINES, Iowa, Aug. 12, 2019 /PRNewswire/ -- Today Meredith Corporation's (NYSE: MDP: [Meredith.com](https://www.meredith.com)) [MONEY.com](https://www.money.com) announced its sixth annual [Best Colleges for Your Money List](https://www.money.com) with University of California-Irvine landing the top spot, followed by City University of New York-Baruch College and Princeton University, respectively. This comprehensive list showcases a wide variety of schools, ranging from elite colleges and public universities to smaller specialized colleges.

"We are thrilled to announce that this year's list marks the first time a public college has received the number one position," says Editorial Director of MONEY.com and Finance Content Strategy Adam Auriemma. "College is the ultimate investment and our Best Colleges franchise gives us an opportunity to connect with families leading up to one of their most significant financial milestones. Higher education is a hot topic, and with more options than ever, we offer insight into educational quality, affordability and alumni success, and we help guide students in the right direction."

MONEY's Top 10 Best Colleges for Your Money are as follows:

- University of California-Irvine

Methodology

MONEY's rankings include only U.S. colleges that have sufficient reliable data to be analyzed. Colleges must have a graduation rate at or above the median for their institutional category (private, public or historically black college or university), or they must fall in the top 25% of the value-added graduation analysis. In other words, they must have unusually high graduation rates compared with schools that serve students with similar test scores and socioeconomic backgrounds.

Institutions were screened out if they showed at least two signs of financial difficulties, such as low bond ratings or being labeled as having financial problems by the U.S. Department of Education. MONEY also screened out military academies that require a commitment of service in exchange for free tuition because of the difficulty of estimating the cost of the service commitment.

The remaining 744 schools were then ranked based on 26 factors in the three categories listed below.

1. Quality of Education: 1/3 weighting

The six-year graduation rate and value-added graduation rate account for most of this measure. Graduation rate calculations were adjusted to specifically include the transfer student population at each college. This section also includes a college's student-faculty ratio to recognize campuses where students have more personal time with professors, as well as the number of Pell Grant recipients a school graduates as a way to analyze how well schools support low-income students.

2. Affordability: 1/3 weighting

This category combines both short-and long-term affordability.

- Short-term measures include the net costs that students actually end up paying after receiving aid, the period of time it takes to earn a degree, and the amount of money that students and their parents typically borrow through federal programs.
- Long-term measures center on student-loan default and repayment rates. MONEY balances those factors with its value-added analysis to reward colleges that aid students with lower test scores and family income.

3. Outcomes: 1/3 weighting

Outcomes are based primarily on alumni salary data from PayScale.com and the federal College Scorecard. MONEY includes a value-added analysis of the PayScale earnings reports, accounting for the socioeconomic background of the student body and the mix of majors. Finally, the share of students who are unemployed or are earning less than the average high school graduate six years after they enrolled in college is also considered.

ABOUT MONEY.COM
